- [Appendix B: Disparity indexes for 2000-2006 are compared](#)
- [Appendix C: Key indicators using 2000 census figures for each jurisdiction](#)

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law [Section 590.650](#), RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2006 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Population	4,498,871	3,783,810	490,250	94,062	62,762	19,697	48,290
Stops	1,603,245	1,280,884	260,899	36,510	12,950	1,320	10,682
Searches	128,377	87,853	34,076	5,380	391	132	545
Arrests	94,286	63,473	26,264	3,862	296	97	294
Statewide population %	100%	84.11%	10.90%	2.09%	1.40%	.44%	1.07%
Disparity index	- - -	.95	1.49	1.09	.58	.19	.62
Search rate	8.01%	6.86%	13.06%	14.74%	3.02%	10.00%	5.10%
Contraband hit rate	21.19%	22.61%	18.72%	14.35%	15.86%	26.52%	16.88%
Arrest rate	5.88%	4.96%	10.07%	10.58%	2.29%	7.35%	2.75%

Notes: Population figures are 2006 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[[back to top](#)]

II. STATEWIDE FINDINGS

This report summarizes the data from [635 law enforcement agencies](#) in Missouri for 2006. [Footnote 1](#) This represents 90 percent of the 708 law enforcement agencies in the state. (An additional 54 of those agencies indicated they made no vehicle stops during the year.)

The agencies filing reports recorded a total of 1,603,245 vehicle stops, resulting in 128,377 searches and 94,286 arrests. [Table 1](#) breaks out the stops, searches and arrests by race and ethnic group. [Footnote 2](#)

The population totals in the table are census estimates for 2006 compiled by Geolytics Inc. In reports for years prior to 2005, the population totals were from the 2000 census. The estimated totals are used in this report to reflect population change in Missouri since 2000. "These estimates," according to the U.S. Census Bureau, "are used in federal funding allocations, **as denominators for vital rates** and per capita time series, as survey controls, and in monitoring recent demographic changes" (emphasis added; see www.census.gov/popest/estimates.php). [Footnote 3](#)

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in vehicle stops. The first, termed the "disparity index," relates each group's proportion of total vehicle stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group's proportion of vehicle stops equals its population proportion: it is neither "under-represented" nor "overrepresented" in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate underrepresentation. For example, the 1,280,884 whites who were stopped accounted for 79.9 percent of all vehicle stops in 2006.

Whites comprise an estimated 84.1 percent of Missouri's driving age population. The value for whites on the disparity index is, therefore, .95 (.7989107/.8410582). Whites were stopped, in other words, at slightly below the rate we would expect based on their fraction of the estimated population age 16 and older.

The same is not the case for several of the other groups. African-Americans represent 10.9 percent of the population 16 and older but 16.3 percent of all vehicle stops, for a value on the disparity index of 1.49. African-Americans were stopped at a rate 49 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate slightly above their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.57 times that of a white motorist (1.49/.95). In other words, African-Americans were 57 percent more likely than whites to be stopped in 2006.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not on the population of motorists on the state's streets, roads and highways.

A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 8.01 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists who were stopped. The search rates for the groups also can be compared directly with one another. African-Americans were 1.90 times more likely to be searched than whites (13.06/6.86). Hispanics were 2.15 times more likely than whites to be searched (14.74/6.86).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. Contraband was found in just over 20 percent of all searches. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 21 percent of all searches conducted in 2006. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 22.6 percent, compared with 18.7 percent for African-Americans and 14.4 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in Table 1 that may be useful for assessing racial profiling. Just under 6 percent of all vehicle stops resulted in an arrest (94,286/1,603,245). The probability of arrest varies across the race and ethnic groups.

Between 10 percent and 11 percent of the stops of African-Americans and Hispanics resulted in arrest, compared with 5 percent of the stops of whites. African-Americans and Hispanics are stopped and searched more often than whites, but they are arrested more often as well.

There are three appendixes to this year's full report. [Appendix A](#) presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year's report compares the 2006 disparity index to the disparity indexes for 2000 through 2005. [Footnote 4](#) These comparisons are presented in [Appendix B](#).

For each agency, the disparity index for each raceethnic group is presented for 2000-2005. For the state as a whole, the key indicators show very small changes between 2005 and 2006. The disparity index is generally stable across the two years, with small increases for African-Americans and Hispanics.

The search rate (the percentage of stops in which a search is conducted) for these groups also grew somewhat. This increase may reflect the higher arrest rates for African-Americans and Hispanics in 2006 (10.1 percent and 10.6 percent, respectively) compared with 2005 (8.2 percent and 8.6 percent, respectively).

The third appendix included with this year's report, [Appendix C](#), presents the key indicators using the 2000 census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

Table 2. Agencies that did not submit reports as required by state law

*Denotes agencies that submitted reports, but after the deadline (Section 590.650, RSMo)

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This report represents the seventh annual analysis of vehicle stop data in Missouri, a review which includes information about more than 1.6 million stops by law enforcement in the state during 2006. This report can be compared to data going back to 2000 on the Attorney General's Web site at ago.mo.gov.

Both this report and the 2005 report used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C, found in Volume 9, provides key indicators by each agency using the 2000 census information.)

The overall number of stops reported grew again significantly in 2006. The number grew from just over 1.5 million in 2005 to more than 1.6 million in 2006. A part of this increase could be explained by a change in the law that took effect in August 2004 that requires reporting of a wider variety of stops, including investigative stops. Another explanation might lie in better reporting methods used by various agencies.

As I have said in previous years, the disparity index for African-American and Hispanic drivers continues to be of concern. The disparity index for African- American drivers increased from 1.42 in 2005 to 1.49 in 2006, while the disparity index for Hispanic drivers increased from .97 in 2005 to 1.09 in 2006. Both groups continue to have search rates about twice that of white drivers.

With 635 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does help both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leadership role in collecting and examining vehicle stop data on this scale. We continue to show that commitment through laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri law enforcement continues to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports. The number of agencies that did not comply with the vehicle stops reporting law dropped this year, from 32 to 19, a positive development. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data.

As I have said in my analysis of previous reports: law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. Missourians of all races and ethnic groups and law enforcement officers from throughout the state are committed to this premise with me.

[[back to top](#)]

FOOTNOTES

Footnote 1: The city of Independence has been excluded due to errors in stop data.

Footnote 2: Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 3: For detailed descriptions of the methodology used in forming the population estimates, see www.census.gov/popest/estimates.php and www.geolytics.com/USCensus.Estimates-Projections.Data.Methodology.Products.asp.

Footnote 4: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

ACCURACY VERIFICATION

in two PDF files:

[Part 1](#): Adair County-Latour. [Part 2](#): Laurie-Wright County.

Accuracy verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate. Following the March 1 deadline, calls were made to a number of agencies regarding incomplete or inaccurate data.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

Agency response

The Bel-Nor Police Department also provides police services through contractual agreement to the Village of Bellerive Acres and the City of Greendale. The data submitted for Bel-Nor Police Department reflects all three municipalities. Also, surrounding communities in the general area have higher minority populations which utilize the two state highways through our jurisdiction.

Agency response

Columbia is a growing community with three large manufacturing companies (3M, Square D and Quaker Oats) and several smaller companies (American Air Filters and Dana). There is a large university and two smaller colleges in Columbia. Columbia's daytime population is greater than any other time of day with commuting workers. There is a large shopping mall and Columbia is the conjunction of two major highways (I-70 and Highway 63). There are also five hospitals in Columbia (Ellis Fischel Cancer Hospital, University Hospital, Boone Hospital, Columbia Regional Hospital and the VA Hospital).

Agency response

We have 4 major shopping centers, and 6 strip malls with a total of 172 retail stores and 10 banks. We have 2 interstate highways that access our city with approximately 170,000 vehicles per day per highway. Our daytime population is approximately 50,000 and our city is located next to the St. Louis County Courts, Jail, and Government Center. The Metrolink light rail system was completed with a substation in our city with an attached 10 story parking garage accommodating 1200 parking spaces. Currently under construction are 150 condos with 2 parking garages accommodating 480 parking spaces each with a 6 story hotel attached, all within our city limits.

Agency response

Camden County is one of several counties surrounding the Lake of the Ozarks. The Lake of the Ozarks is a major tourist attraction in Missouri and as such has a large influx of tourists of all races. Thus percentages based on county estimated census would not be accurate. A sampling of our data for 2006 shows that 60% of persons of one race are not residents of our jurisdiction.

Agency response

One-half of all total stops were on 171 Hwy and the better half of our Black stops were most likely Hispanics, classified as Black. We connect Webb City and Carthage on 171 Hwy and HH Hwy. Both towns are populated with high numbers of legal and illegal Hispanics. This should be the contributing factor for the Black index.

Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, a juvenile detention center and the St. Louis County Justice Center, which houses over 1,200 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop, or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Boulevard, and Forsyth Boulevard. Therefore, it is felt that, for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan Area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton.

Agency response

The City of Clinton is located on the main route between the Kansas City metropolitan area and the City of Springfield. As a consequence, a large number of non-Clinton residents pass through the City of Clinton. 39% of all traffic stops made by the Clinton Police Department take place on state highways. Given the number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the City of Clinton are inherently flawed.

Agency response

The City of Crestwood has a small section of Interstate 44; we have a large portion of State Hwy 366 which is primarily retail sales. We also have Westfield Shopping Town at Crestwood Plaza which is an enclosed mall just off the state highway.

Agency response

Crocker Police Dept. has a disparity of 11.56 for blacks and a disparity of 8.48 for Hispanics. During the year 2006, we have had a building boom in our area with many military moving into the area who are black or Hispanic. We also are a highly traveled corridor between Ft. Leonard Wood and Lake of the Ozarks and Jefferson City.

Agency response

The City of Edmundson is located on Interstate 70 and is situated directly across from Lambert International Airport. There are three primary roadways within the city: Interstate 70, Natural Bridge and Edmundson Road. Interstate 70 is the major thoroughfare between St. Charles and St. Louis thereby garnering a great deal of transient traffic. Equally, it is the means for arrival to and departure from Lambert International Airport. Natural Bridge runs parallel to Interstate 70 and it houses a number of hotels, restaurants and car parking facilities. It too garners a great deal of traffic related to these entities. Edmundson Road runs through the center of the city; it serves as a crossover from St. Charles Rock Road to Interstate 70. The majority of traffic stops are involving individuals who are not citizens of Edmundson but rather are traveling through either on business or some other retail related endeavor. The mere number of vehicles passing through the area has the potential of skewing a statistical count when compared to the listed population and demographics of that population.

Agency response

The City of Festus has a large interstate highway (I-55) that runs down the middle of the city along with a very busy state highway (Hwy. 61-67). These highways bring several different people from outside the area to our city. Our city also has several large retail establishments that people from all over come to patronize. There are several restaurants, gas stations, and hotels near our interstate exits that have the ability to cater to a large, diverse driving population. This area continues to grow with different restaurants and other retail locations being built.

Agency response

While the 2000 census probably accurately reflected the number of African-Americans residing in the city limits at the time, it neither accounts for the population figures of several neighborhoods annexed into the city since that time, which has increased our population to approximately 54,000; nor does it include the many others who spend time in our community each day. The City of Florissant, like many other similar cities, offers many amenities to our citizens and North St. Louis County and St. Louis City neighbors. The city is home to numerous business districts, shopping centers, restaurants, department stores, supermarkets, and specialty stores, all of which serve residents of the entire area. Additionally, numerous arterial roadways, such as county, state and even a portion of any interstate highway, service the city and provide access and travel routes for our citizens and neighbors. The majority of traffic stops occur on these roadways. Florissant prides itself as a culturally diverse community made up of vastly larger populations of minorities who use city services each day and are not accounted for in official figures. The higher ratio of visiting population is due to significantly higher percentages of African-American citizens living in every one of our adjacent communities. These include the City of Ferguson (52.3%), the City of Hazelwood (16%), the City of Black Jack (71.2%), the City of Dellwood (58.2%), and Spanish Lake (54.5%), to name a few. The Ferguson-Florissant and Hazelwood School Districts both serve our city, as well as the other communities mentioned, and the student ratio is 65% African-American. When all these factors are taken into consideration, the traffic stops reflected in our annual report are truly representative of the motoring population that drives in our city.

Agency response

I have reviewed the report as compiled noting that the disparity index for Black and Hispanic is greater than one. As requested our response to the issue raised by the disparity index is to offer an explanation of the location of the stops. The City of Gladstone has three state highways and one interstate highway that run through the area. In addition, there is a major home improvement center located in the southwest corner of the city. This is a center that draws retail business from throughout the area including residents from the State of Kansas. This center also is located in close proximity to three of the four highways that run through Gladstone. It should also be noted that the City of Gladstone is entirely landlocked by Kansas City, Missouri with major thoroughfares that allow through travel by Kansas City residents. A review of the data submitted shows that 26% of the Blacks and 22% of the Hispanics that my officers came into contact with occurred during stops on the highways that run through our city. In addition, we believe the data collected should include resident status to provide an accurate reflection of our community at large. Considering the boundaries of Gladstone, the surrounding areas and highways described would indicate that a large proportion of the drivers stopped in all races are not Gladstone residents. If this information was being utilized in the calculation of the disparity index, which measures against the community's population figures, then the disparity index should drop proportionately and reflect that there is not a disparity in Gladstone.

Agency response

The City of Glendale is located in mid St. Louis County. We are within five minutes of four major shopping centers. We have one state highway and two county arterial roads in our jurisdiction. We are within a half-mile of Interstate 44, which allows for easy access to St. Louis and the interstate system.

Agency response

The City of Hannibal has both the US 61 and US 36 Highways intersecting within its boundaries. In addition, Hannibal is known as "America's Hometown" and for "Mark Twain" which draw a sizable number of tourists annually. Considering all these factors demonstrates Hannibal's local population and is not a true reflection of the racial encounters experienced by local law enforcement. The statewide population % concerning race is a truer reflection of traffic stops experienced by Hannibal officers. If the statewide population % is a more accurate indicator of the racial makeup of the drivers Hannibal officers encounter, then the disparity index would be less than 1 (under-representation).

Agency response

The City of Hazelwood is located in North St. Louis County. Interstate I-270 transverses the city east and west carrying over 140,000 vehicles per day. Interstate I-170 culminates at I-270 in the city. We have three major north/south arterial roads which also traverse our city with Lindbergh Blvd carrying over 75,000 vehicles per day. The city is the industrial hub of the region with over 22,000 workers arriving and leaving daily. Hazelwood is the home of St. Louis Mills Shopping Complex, which hosts over 3 million visitors per year.

Agency response

The City of Holt is located about 20 miles north of Kansas City, in both Clay and Clinton Counties. Three major highways are within Holt city limits: Interstate 35, 33 Highway, and PP Highway. A large amount of interstate traffic utilizes Holt for lodging, dining, or refuel. Several large subdivisions surround Holt and many of those residents travel through Holt on a daily basis.

Agency response

The disparity index details that the "Black" and "Asian" categories are over represented with factors of 2.49 and 3.38 respectively. The disparity index as displayed here is based on a comparison of stops in Holts Summit and the State Average for each population and does not take into account local population and through traffic populations. The population of Missouri based on race is not evenly distributed in the State of Missouri and are not stationary. Therefore, using local numbers compared to state numbers creates a flawed basis for statistical analysis. Any final report also must indicate inherent problems when conducting statistical analysis when low numbers are used to develop the statistics. For example the report indicates that Holts Summit displays a 3.38 disparity index in relation to "Asian" stops. However, when you look at the actual numbers used to develop this index, it indicates that only 4 stops were made in all of 2006 where "Asian" was the perceived race of the driver. Two of the stops were also the same driver. The same issue is demonstrated in the disparity index for "Black." In 2006 only 55 stops were made where the perceived race of the driver was "Black." Yet the statistical analysis indicates a disparity index of 2.49. The Arrest Rate indicated in the data also shows 1.51 for "White," which would appear to indicate that "White" is over represented. However, only 13 arrests were made in all of 2006. Again, low numbers in this form of statistical analysis results in misleading data when only the result is examined.

Agency response

Iberia has the intersection of Highways 42 and 17 between Lake of the Ozarks and Ft. Leonard Wood. Iberia also had a contractor that employed illegal immigrants and housed them in our city.

Agency response

The Independence Police Department is an internationally accredited Police Department that does not tolerate racial profiling. Last year in an attempt to get more accurate compiling of data, we purchased the Scantron System and were trained by their personnel on that system. Our numbers dramatically increased. We have recently found out by hand counting the forms that the machine was not working properly. Each time we entered a Scantron form, we saved the information, then later came back to enter more data. The machine calculated all the previous data that was entered and added that amount to the end of what was just entered. This caused our total stops to be inaccurate. Although the total ratio would still be correct, our total stops were not calculated correctly. We are now looking into a different system so our numbers will be accurate. Our total stops of minority drivers have consistently remained between 7%-9% of the total driving population with the small disparity most likely being accounted for by the fact that Independence shares its borders with Kansas City, Missouri. What this does point out in our recount is that we are still not reporting the correct number of vehicle stops although we did improve over last year. We are now in the process of correcting this by whatever actions deemed necessary to see that these forms are filled out in a timely and accurate manner. We apologize for this incorrect total of traffic stops, and we are correcting this situation immediately. We want to abide by all the laws and policies of the State of Missouri.

Agency: Indian Point Police Dept.

Population: 540

age 16 and over

Agency response

Jasper County is located in the SW corner of the State. We have major interstates that run through the county. For example, we have several miles of I-44, and U.S. 71. Also, we have a major university (Missouri Southern State Univ.) in our county and a large shopping mall. Many of the citizens we stop or come into contact with are not from Jasper County, but either work in one of several large businesses or are students at the University. We also have a large city in Jasper County (Joplin) which attracts a lot of travelers from other areas. Joplin's population is only approximately 45,000 but according to the Chamber of Commerce, there are well over 100,000 people in Joplin on a daily basis, who travel through our county to get to Joplin. I would also like you to know we, Jasper County Sheriff's Office, take racial profiling very serious and I constantly watch what my people are doing on a daily basis in Jasper County.

Agency response

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 1.9 million, which adds to the commuter population on the major thoroughfares. Also, when examining search rates, the probable cause/authority to search reasons should be considered. By design, the form on which the AG office submitted the summary report did not include the new category Stop Outcome "Other", which accounted for 5,049 stops. The Total Stops figure, however, includes stops associated with this new category. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

Agency response

Kirksville is home to two major universities whose enrollment data is not totally reflected in the census figures. Truman State University and Kirksville College of Osteopathic Medicine account for an additional 6,000 students/residents (in 2003, 16 percent of whom are identified as other than white, and 96 percent come from outside Kirksville, including at least 26 international students). Kirksville is located on one of the few major north-south state highways (Highway 63) that service northern Missouri and southern Iowa. 8,700 vehicles per day travel the highway into and out of town. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This expands the pool of those not counted in the city's census information.

Agency response

Interstate 70 borders the City of Lake Saint Louis to the north and U.S. 40/61 bisects the south end of the municipality, resulting in a fair amount of non-local traffic. Consequently, many drivers stopped for traffic violations in this venue are non-residents. Because of this, calculating a disparity index based on a comparison of ethnicity of drivers stopped with the ethnicity of the local population may be misleading. For example, while the disparity index for blacks indicates over-representation when based on local population (2.92); under-representation is indicated when the comparison is calculated based on statewide population (0.64).

Arrest rate	4.53	4.59	0.00	10.00	0.00	#Error	0.00

Notes: Population figures are 2006 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

RACIAL PROFILING DATA/2006

Agency: Linn Police Dept.

Population: 1,092

age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops	427	410	9	5	1	0	2
Searches	71	69	1	1	0	0	0
Arrests	56	54	1	1	0	0	0
Statewide population %	N/A	84.22	10.73	2.13	1.39	0.44	1.09
Local population %	N/A	98.44	0.27	0.27	0.46	0.09	0.55
Disparity index	N/A	0.98	7.67	4.26	0.51	0.00	0.85
Search rate	16.63	16.83	11.11	20.00	0.00	#Error	0.00
Contraband hit rate	60.56	60.87	100.00	0.00	#Error	#Error	#Error
Arrest rate	13.11	13.17	11.11	20.00	0.00	#Error	0.00

Notes: Population figures are 2006 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Agency response

Marshall has a major north/south highway (U.S. 65) running through it, along with a primary east/west interstate highway (Interstate 70) located just 10 miles south of Marshall, which means the police stop drivers of any race in Marshall. Marshall has two major employers, Cargill Meat Solutions and ConAgra Frozen Foods, that have a large Hispanic workforce. Marshall is home to Missouri Valley College, a liberal arts college that has many minority students. Marshall Habilitation Center, a state facility for the mentally and physically disabled, also has a very large workforce, not all of whom live in Marshall. Of the Black drivers searched, 65 percent were incident to arrest. Of the Hispanic drivers searched, 93 percent were incident to arrest. Of the Asian drivers searched, 66.6 percent were incident to arrest. Department policy requires searches incident to arrest for officer safety.

Agency response

Olivette is a major corridor for the St. Louis Metropolitan area with major interstates and roadways that pass through or are immediately adjacent to the city. These interstates and roadways are the pipeline connecting thousands of people traveling into and through Olivette for business and pleasure purposes. These roadways also serve thousands of motorists throughout the region traveling to and from various destinations. Thus, the motorists stopped for traffic violations are more reflective of the population of the metropolitan area rather than the resident population of Olivette. Starting the last quarter of 2006, MoDot began the I-170 construction project which has increased the number of traffic stops by local law enforcement.

Agency response

The City of Osage Beach is unique in that it lies along the shores of the Lake of the Ozarks, one of the largest man-made lakes in the world. The City is a major destination resort area and has wide fluctuations in population during the year. The City is also home to Osage Beach Premium Outlets, a shopping mall featuring over 110 stores.

Agency response

Our higher than proportional incidence of stops of black and Hispanic citizens centers around the fact that there are 6 food processing plants within a 45-minute drive of Sedalia. The workers live in and around Pettis, Johnson and Saline Counties and drive to the plants daily. Tyson Foods of Dresden, Missouri is the largest food processing plant in Pettis County. These plants employ a large number of Hispanic and black workers. Many of the Hispanic workers are illegal aliens and as such do not appear on the census rolls. Along with this is the fact that the University of Central Missouri is located in Warrensburg, Missouri in Johnson County. A large number of day and evening students from surrounding counties commute to UCM daily. Vehicle stops by the Sheriff's Office are based on traffic violations observed, not the possible race of the drivers. The vast majority of the time the race of the people stopped is unknown until the vehicle is actually stopped. Searches are conducted based on the actions of the individuals stopped or incident to lawful arrest. Race is not a factor in deciding who will or will not be asked for consent to search or who will be searched incident to arrest. The contraband hit rates of 50 for black citizens searched and 30.77 for Hispanics speak well for the instincts of the officers of the Pettis County Sheriff's Office. The arrest rate of 9.89 for black citizens and 34.78 for Hispanics indicates that the officers are performing based on probable cause not the race of the individual.

Agency response

While the population of Platte Woods is 404 per your racial profiling data/2006, we have a traffic count of over 84,000 vehicles per day traveling through our city. This would account for the disparity index being out of proportion to our population.

Contraband hit rate	31.44	32.14	22.22	0.00	#Error	0.00	#Error
Arrest rate	8.82	8.90	11.63	3.33	0.00	0.00	0.00

Notes: Population figures are 2006 Census estimates for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Agency response

The City of Raymore, Missouri, maintains the only 24-hour Wal-Mart Supercenter in the entire south Kansas City metropolitan area. The Supercenter services a number of communities, such as Grandview, Raytown, and south Kansas City, all of which have a more racially diverse population than Raymore. It is the position of the Raymore Police Department that any disparities in the proportion of stops/proportion of population can be attributed to the fact that a large portion of the motoring public does not reside within the city limits of Raymore.

The City of Richmond Heights is a 2.8 sq. mile city incorporated in 1913 located on the western boundaries of the City of St. Louis. Richmond Heights has three miles of U.S. 64 (Highway 40) running directly through it. Highway I-170 runs north and south from U.S. 64 to the city limits of Clayton. Located in Richmond Heights is the Galleria Shopping Mall and the new Boulevard Shopping District. The Galleria Mall and the Boulevard generate approximately 11 million shoppers or visitors each year. Richmond Heights also borders the City of Clayton, which is the county seat for St. Louis County. Thousands of vehicles travel through Richmond Heights on a daily basis due to its geographic location. Estimated daytime population of Richmond Heights is 26,000.

Agency response

The City of Smithville is located at the intersection of US Highway 169 and 92 Highway, which connects Smithville to three interstate highways, I-29 to the west, I-35 to the east, and I-435, which encircles Kansas City, is located just one mile south of the Smithville city limits. According to recent figures supplied by the Missouri Department of Transportation, approximately 3.9 million vehicles pass through the city each year. The volume of traffic is due to the proximity to the Kansas City metro area for jobs, the large number of families moving to the rural area, and recreational activities associated with the Smithville Lake area. Smithville Lake is a 7,000 acre recreational lake with two public golf courses. The lake records in excess of one million visitors per year and an estimated 75,000 rounds of golf are played at the golf complex.

Agency response

As indicated, the White population is more than 92% with less than 4% Black and less than 2% Hispanic (known). Our demographics are directly affected by having two major interstates traversing our County (I-70 and I-64), the presence of a large shopping mall along one interstate (Mid Rivers Mall), and several major employers within the county such as Citigroup, General Motors, SSM Healthcare, Ameristar Casino, and Mastercard International with a total workforce of more than 15,000. It is my opinion that these facts and circumstances should be seriously considered when analysts are determining work ethics of law enforcement agencies.

Agency response

There was a total of 65,167 vehicle stops reported by officers of the Saint Louis Metropolitan Police Department in 2006. African-American drivers made up 52.6% (34,284) of the total; while white drivers comprised 43.7% (28,448). The data for 2006 is most comparable to 2005 for two reasons. 2005 was the first year that all vehicle stops were required to be reported. Previously, only stops for traffic violations were reported. This resulted in several thousand more vehicle stops than in years prior to 2005. The new category of Investigative Stops made up 13.96% (9,098) of the 2006 total. Additionally, electronic reporting replaced Scantron reporting in 2005. The persons stopped in vehicles were searched by police 6.8% of the time (65,167 stopped; 4,399 searched). Much of the search to stop ratio may be explained by the fact that Investigative Stops are now included in the report. This category of stop includes suspicious vehicle checks and wanted vehicle stops. SEARCHES WITH ARREST WARRANTS OUTSTANDING: In 2,320 of the 3,738 arrests, there was an outstanding warrant for an occupant of the vehicle. The arrest of a person on an outstanding warrant requires that a custodial search be performed. There were 1,897 African-Americans and 388 whites arrested on warrants following a vehicle stop. The remaining 35 arrests were of other races/ethnicities. SEARCHES WITHOUT AN OUTSTANDING ARREST WARRANT: There were 2,020 stops where a search was conducted on a white or African-American without an outstanding warrant. Of that number, 1,392 (68.9%) were African-American and 628 (31.1%) were white. The disparity was a result of 764 more searches of African-Americans.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the City of St. Louis and, therefore, increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. Our Department policy specifies that race-based detentions, traffic stops, arrests, searches and seizures of property are forbidden. In 2006 our Department received 360,932 calls for service; officers made 18,023 full-custody arrests and 60,770 traffic stops with no complaints of racial profiling. All commissioned officers participate in annual cultural diversity and sensitivity training and specialized training that prohibit the illegal practice of racial profiling. Supervisors review traffic stop data on a quarterly basis to ensure that officers do not engage in biased based policing.

Agency: **St. Louis Park Rangers**

Population:

age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Agency response

It is unfortunate that our disparity index is based upon the population demographics of the City of Town and Country, which has a population of approximately 11,000 people with an African-American population of 1.98 percent. Nearly 400,000 motorists travel through our city limits each weekday with the second most voluminous interchange in the state (Interstates 64 and I 270). Our motoring public is reflective of the demographics of the state and St. Louis County, which are comprised of African-American populations of 10.25 and 19 percent respectively. The traffic stop data for Town and Country Police Officers indicates that only two percent of the motorists stopped are residents of Town and Country. The natural implication of this statistic is that the ratio of the race of motorists stopped for violations would reflect state and county demographics, not the City of Town and Country. The Town and Country Police Department is committed to the fair and impartial application of the law while attempting to maintain a safe environment for all people who travel in and through our city limits. A careful examination of the data indicates that our practice matches this policy.

Agency: Tracy Police Dept.

Population: 190

age 16 and over

Agency response

We are very unique in our population because of our role in the community. We are a University Police Department with approximately 16,000 students and another 3,000 faculty and staff personnel. Our student population is a diverse cross mix of international students and local community participants. Furthermore, the "transient" or "passing through" driving population is such that it is unmeasurable. There are no real community standards or city to base our population on that would be an accurate depiction of our University. In addition, the amount of visitors to our campus for various functions is also unmeasurable. It is unknown what percentages of stops are made on University related people, and the number that is just because of happen-stance.

Agency response

The following is offered as additional information to further clarify and help put the data in fuller context. Located within the city limits are six (6) major chain hotels and three (3) major chain car rental agencies who employ Blacks as a large percentage of their workforce. Woodson Terrace is bordered to the east by the City of Berkeley whose majority population is Black. Located within the city limits are two (2) Mexican restaurants, two (2) Mexican groceries, one (1) Hispanic currency exchange, and an insurance brokerage firm whose primary clients and workforce are Hispanic. Interstate I-70 and State Highway 115 travel east and west through the city and State Highway EE travels north and south with these major routes connecting Woodson Terrace to the surrounding and outlying area. The northern city limits adjoin Lambert St. Louis International Airport which attracts a diverse segment of the population, to include Black and Hispanic, with access gained via Interstate I-70 and State Highway 115.

AGENCY	White	Black	Hispanic	Asian	Am Indian	Other
--------	-------	-------	----------	-------	-----------	-------

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.
